HTML, CSS, JavaScript, Bootstrap, ReactJS, Git, Redux, Responsive Web Design, TAILWIND, MATERIAL UI, Object Oriented Programming, GitHub, Software Development Life Cycle, End to End Testing, Selenium, Automation Testing, Web Application, User Interface Design, Azure DevOps Server, Continuous integration, Cypress.

PERSONAL PROJECTS

Student Performance Analysis System
The "Student Performance Analysis System" is a user-friendly software designed to help educational institutions efficiently manage student data, track grades, and analyze academic performance. It enables customization to suit specific needs, facilitates communication, and ensures data security. This system empowers educators and administrators to make data driven decisions, ultimately enhancing student outcomes and the overall educational experience
